*Thank you for your interest and support of our program. We do appreciate it.*

*The Dubs Family*

Dear Friends,

Kathy and I and our family would like to welcome you to our 2021 Registered Angus Private Treaty Bull Offering. This is our 33rd year of selling registered Angus bulls in Montana.

As in the many past years, we are feeding our private treaty bulls at our Bridger farm. Our sire selection includes Entice, Value Added, Acclaim, Ashland, Treasure, Innovation, Protocol, Flat Top, Granite Innovation, Double Traction, Apex Mtn Front and Medicine Spirit.

Our pre-conditioning vaccination program in August included Bovi-Shield Gold One Shot, Ultrabac 7+Somubac, and they were poured with Dectomax. At the start of the gain test in late September, they received Bovishield Gold 5, Ultrabac 7+Somubac and Once PMH. In December, they got a Fusogard shot and were poured with Ivermectin.

As in years past, they were fed a high roughage ration to achieve a moderate gain to preserve structural soundness and fertility. That ration included chopped hay, silage, and corn. We don't like to push the bulls too hard while in the test and hope to have an average gain of 2.7 to 3.0 pounds per day. That extremely cold spell in February surely held the gain back a slight bit. We will be clipping the bulls and fertility testing in early March. That information will be available from Dr. Lyle Bischoff, Powell Vet Clinic, by Opening Day, March 20.

We are proud of the progress we continue to make in carcass traits. Every bull will have a positive EPD for both marbling and ribeye again this year. In addition to EPD's and Genetic Testing, we tabulate and analyze actual Ultrasound Data. All the bulls have been ultrasounded for marbling, ribeye, rib fat, and rump fat by Eric Geving, Precision Ag Services, Cody, Wyoming. That information is on page 5.

We re-tagged the bulls and they are cataloged by sire groups. We have included the cow tag number in the index and since the cows are here at Bridger close to the barn, you are more than welcome to view them and their baby calves. Our cows summered on our dryland ranch 10 miles north of Columbus. Another trait we feel is very important is docility. People who help us with our cattle always comment what a tame set of cows we have.

**Saturday, March 20 at 1:00 pm will be the opening of our 2021 Private Treaty Sales.** The bulls will be priced from \$2,250 to \$4,500. We will have a board in the barn with all the sale lot numbers. Any bulls you are interested in, please write your name or buyer number by that Lot number. At 1:00 pm, if more than one person is interested in the same bull, we will have a bid-off on that bull. Guidelines and examples will be posted in the barn. If you cannot be there at 1:00 pm, you can call in and we will

## EPD EXPLANATION

**Calving Ease Direct (CED)** is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Maternal Milk EPD (Milk)**, expressed in pounds of calf weaned, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Carcass Weight EPD (CW)**, expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of USDA marbling score, is a predictor of the difference in marbling of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (REA)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

**Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

write your name by the bull(s) you are interested in. You can participate in the bid-off over the phone if the need arises.

Please give us a call with any questions or if you are interested in a bull and can't make it over on the 20th. Cell phone service is not real dependable at the barn so please let us know ahead of time and we will be sure to call you by 1:00 when it begins if you wish. Our cell numbers are **406-208-8653** (Louis) and **406-208-8643** (Kathy). We'll have coffee and donuts in the morning if you come early and lunch beginning at noon that day. Kathy and I and our family Allison Dubs, Katrina, Adam, Reagan and Rhett Petersen, as well as Adan Gandara will be around all day to answer any questions you may have.

We look forward to seeing you this spring. Come look at the bulls anytime at your convenience. We really appreciate your past support of our program.

*Louis and Kathy Dubs*

## INFORMATION

Louis - cell **406-208-8653**

Kathy - cell **406-208-8643**

House - 406-652-7515

windingriverangus@gmail.com

**WINTERING** - Free wintering until May 1.

**VOLUME DISCOUNT** - We will offer a 2% discount on 2 bulls, 3% on 3 bulls, 4% on 4 bulls and a 5% discount on 5 or more bulls purchased by the same person.

**PERFORMANCE DATA** - Birth weights, 205 day weaning weights, nursing ratios, dam's production record, yearling weights, Average Daily Gain, and projected March 20 weight are included in this catalog. All EPD's are current as of 2/22/2021.

**FERTILITY** - Dr. Lyle H. Bischoff, Powell Vet Clinic, Powell, Wyoming will be fertility testing the bulls again this year. That information will be available by Opening Day, March 20.

**CARCASS and ULTRASOUND DATA** - The bulls were ultrasounded by Eric Geving, Precision Ag Services, Cody, Wyoming for Carcass Traits on January 29 and the data was tabulated by the American Angus Association. That information is on page 5.

**TEST AND SALE SITE** - The bulls are located four miles south of Bridger on Hwy. 72 on the west side of the road. The address is 1811 Hwy. 72, Bridger, Montana, 59014.

*Not Responsible for Accidents*

## 2021 BREEDING SEASON GUARANTEE

For those bulls that sell for \$3,000 or more, we will split the risk with you 50-50. This plan is good for the first 90 days after the bull is turned out. If he becomes injured during that time and cannot return to service, have your vet take a look at him and give you a written diagnosis/prognosis. The bull can then be sold for salvage. Take the amount you paid for the bull minus the salvage value and then divide that amount by two. That will be your credit for another bull. Please let us know as soon as possible and no later than 9/15/2021.

Example: You pay \$3,500 for the bull. He gets injured 45 days into the breeding season and the vet determines he is through and puts it in writing. You take him to the auction yards and salvage him for \$1,500. You send us a copy of the vet's letter and the ticket from the auction yards. We give you \$1,000 credit on another bull from us in 2021 if one is available or at next year's sale.

Amount paid for the bull \$3,500  
 - Salvage Value - 1,500  
 2,000 ÷ 2 = \$1,000 credit

Looking for something different in an outcross sire? Protocol is a proven cow maker that sires value added feeder cattle too. He is a Select Sires bull.

Sire of #11.

## Ultrasound Carcass Data

Although genetic testing is a very important tool that we use, we also like to analyze the actual carcass ultrasound data because we believe that information is one form of enhancing performance records. Eric Geving, Precision Ag Services, Cody, Wyoming, ultrasounded these bulls as well as our replacement heifers again this year. When you look through the catalog you will notice that every bull has a positive EPD for both marbling and ribeye. The following shows actual ultrasound results for %IMF (Marbling), Ribeye, and Rib Fat. Ultrasounding was done January 29, 2021.

*The three highest marbling and ribeye bulls are in bold.*

Lot #	IMF	Ribeye	Rib Fat

Acclaim's combination of calving ease, growth, end product merit and mating flexibility make him a high use sire within the breed and in high demand at Select Sires. He is a breed leader for \$Feedlot, \$Beef and \$Combined and will create high value feeder cattle.

Sire of #4 - 5.
